

## *Articulation qualitatif-quantitatif dans l'élaboration des scénarios du Conseil mondial de l'énergie*

*Jean-Eudes Moncomble*

Conseil Français de l'Energie

# What is World Energy Council (WEC)

WEC has Member Committees in about 100 countries in the world, including most of the largest energy-producing and energy consuming countries (2/3 of developing countries).

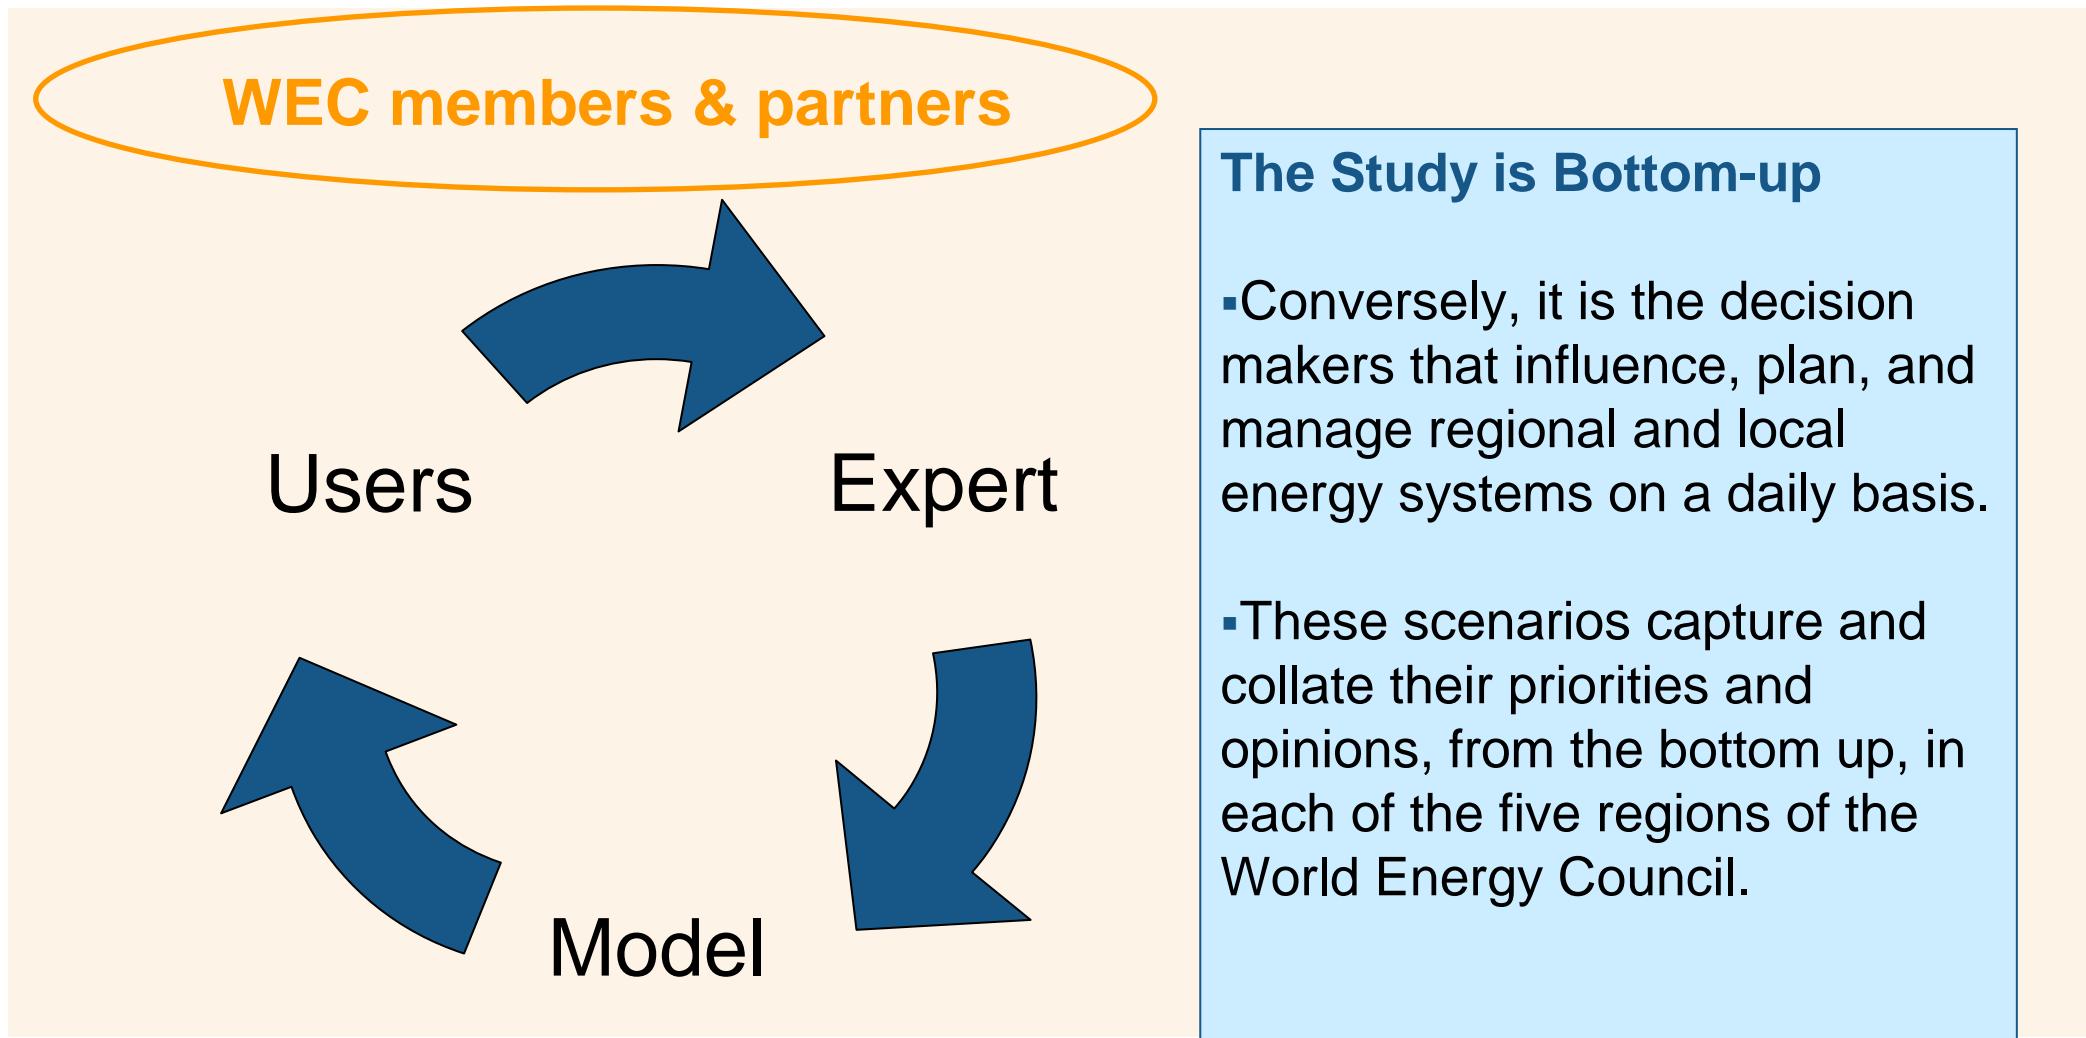

The World Energy Council (WEC) is one of the foremost multi-energy organisation in the world today. Established in 1923, the organisation covers all types of energy, including coal, oil, natural gas, nuclear, hydro, and renewables, WEC is UN-accredited, non-governmental, non-commercial and non-aligned. WEC is a UK-registered charity, headquartered in London.

***To promote the sustainable supply and use of energy for the greatest benefit of all people***

### Ownership structure

# Implementation

Conseil Français de l'Energie

- More than 20 workshops conducted from July 2005 to April 2007 in various regions of the world.
- Views of how to meet the need for energy that is accessible, available, and acceptable by 2020, 2035 and 2050, from over 400 principals from industry, government, academia, NGOs and trade groups.
- Experts from the five global regions, Africa, Asia, Europe, Latin America and North America, and from all facets of energy planning: energy production, finance, academia, civil society, and government.
